

SATYAM KUMAR
Noida, India 201301

Mobile: 7367802551
Email: satyamdeveloper98@gmail.com

Summary

Software Engineer specializing in Angular, React.js, Java, and full-stack development. Key achievements include:

- **Attained 95% code coverage** with automated testing frameworks, enhancing software reliability.
 - **Directed a specialized team** to accelerate feature delivery by 30% through CI/CD pipeline implementation.
 - **Boosted performance of the COTA dashboard** by 25% after migrating to Angular 14 and 18.
 - **Developed a React.js-based UI** for OTA-FLY, optimizing user interactions and telecom SIM management.
-

Experience

Thales - Software Engineer III (Aug 2020 – Present)

Noida, India

- **Development and Migration:** Spearheaded the design and development of the **COTA dashboard** using Angular 10, leading migration to Angular 14 and 18 to enhance performance and maintainability.
 - **React.js Expertise:** Created a React.js UI for OTA-FLY, enhancing user interactions and SIM management for telecom operators.
 - **Code Quality & Testing:** Ensured 95% code coverage with **Karma** and **Jasmine**. Authored and standardized Global Goods Testing Standards (**GGTS**) using **Selenium** and **Robot Framework**, improving test consistency across teams.
 - **End-to-End Automation Testing:** Streamlined UI testing processes through successful implementation of Playwright; achieved a reduction in manual efforts of over 60%.
 - **CI/CD Implementation:** Developed a pipeline doubling release frequency and cutting integration issues by 75%.
 - **Backend Development:** Engineered and deployed robust Java-based APIs targeting SIM service functionalities, improving data retrieval efficiency by 40% while ensuring seamless integration with existing systems for enhanced user experience.
 - **State Management:** Optimized NgRx for faster data retrieval, cutting load times by 30%.
-

Technical Skills

- **Languages & Libraries:** HTML, CSS, SCSS, JavaScript, TypeScript, Java, Angular, React.js, RxJS, NgRx, Bootstrap, Material UI, Tailwind CSS
 - **Testing & Automation:** Karma, Jasmine, Playwright, Selenium, Robot Framework, Cypress
 - **Development Tools:** Gulp, Grunt, WebPack, Docker, Kubernetes, Git, Mercurial, Jenkins, CI/CD
-

Projects

- **COTA Dashboard (*Angular 10, 14, 18, Java, NgRx*)**
 - **Engineered a responsive dashboard** that streamlined **Over The Air (OTA) update management**, enhanced operational efficiency and **reduced troubleshooting time by an average of 50 hours per month** for the engineering team.
 - **Migrated the application framework to Angular 18**, enhancing code maintainability by reducing technical debt and increasing performance metrics with **faster load times under high user traffic conditions**.
 - **AOTA (Advance Over The Air) Solution (*Angular, Java, Microservices*)**
 - **Designed and implemented** an advanced AOTA solution that enabled seamless **SIM updates**, improving efficiency in remote provisioning processes for over 10,000 devices with zero downtime during transitions.
 - **Optimized remote SIM provisioning processes**, improving speed of device activation by 40% and enhancing overall security protocols to safeguard sensitive user data during the transition phase.
 - **OTA-FLY Platform (React.js, Java, Docker, CI/CD)**
 - Built a **React.js-based web solution** for telecom operators to manage SIM updates.
 - Developed a **CI/CD pipeline** for automated deployment.
-

Education

Bachelor of Technology in Computer Science (*Aug 2016 – May 2020*)

Jaipur National University, Jaipur

Accomplishments

- **TIIS Hackathon** - First prize in TIIS Hackathon, showcasing expertise in migration tools for the Trust Nest platform.
